Dear Hiring Manager,

I am writing to express my interest in joining your company. With over 6 years of hands-on experience in backend and full-stack web development, I bring a strong technical foundation, a proven track record in API development, and extensive experience integrating third-party services and payment gateways.

In my current role at **Set Gaji Sdn Bhd**, I specialize in developing and maintaining RESTful APIs using Laravel to support mobile applications, admin panels, and employee platforms. I have designed secure and scalable API architectures, optimized database structures for performance and scalability, and integrated payment gateways such as Hitpay, Rapidpay, and Xendit to support automated salary disbursements. My role also includes implementing third-party API integrations and collaborating with the team using Git and Fork for efficient version control.

Previously, at **BestWeb Technologies International** , I focused on developing and optimizing web applications using PHP Laravel. I created RESTful APIs for mobile app integration, enhanced existing web systems, and ensured smooth data synchronization between platforms. My role also included maintaining code quality, resolving issues in legacy systems, and integrating payment gateways to support various business operations.

During my time at **Lagenz Success**, I contributed to a variety of backend projects using PHP. I developed and maintained CMS websites, built e-commerce platforms, and implemented backend systems for projects such as Dropsynz. I also integrated APIs for Shopee and Lazada, and worked on payment gateway integration to support seamless transactions within client platforms.

Examples of my achievements include:

- Designed and implemented scalable RESTful APIs at Set Gaji Sdn Bhd, supporting critical business operations and improving system reliability.

- Integrated multiple payment gateways, ensuring secure and efficient transactions for salary disbursement and e-commerce platforms.

- Optimized database structures to improve data integrity and scalability across various projects.

- Implemented third-party API integrations to extend system capabilities and enhance user experiences.

With a strong technical background in PHP, Laravel, MySQL, Git version control, and third-party API integrations, I bring a comprehensive skill set to every project. My ability to tackle challenges, deliver innovative solutions, and collaborate effectively with teams has been a hallmark of my career.

With a strong foundation in backend development and a passion for building efficient and maintainable systems, I am confident in my ability to contribute effectively to your development team. I am eager to bring my experience and enthusiasm to your company and help build solutions that deliver real value to users.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and skills can benefit your team.

Sincerely,
Yeap Sheng Ming
